PROFESSIONAL SUMMARY

Cybersecurity-focused professional with 1.5+ years of experience supporting enterprise applications in production, including monitoring, incident investigation and root cause analysis, plus a cybersecurity internship at Airbus. Built an AWS security monitoring project with automated remediation and is developing hands-on detection and investigation experience through a home security lab. Holds foundational security and cloud certifications and is seeking an entry-level cybersecurity role where analytical and investigation experience can add value.

WORK EXPERIENCE

Packaged App Development Associate | Accenture **Jul 2024 - Dec 2025**

- Monitored production batch jobs in Zena and accessed remote Linux production and QA servers via PuTTY to keep dealer-record processing timely and stable.
- Investigated production incidents through debugging and root cause analysis, tracking resolution in ServiceNow.
- Maintained backend features for an enterprise Incentive Management Application using Java, Spring Boot and microservices.
- Wrote and optimized SQL queries for data retrieval and defect resolution; participated in Git-based code reviews.

Cybersecurity Intern | Airbus **Apr 2024 - Jul 2024**

- Learned vulnerability management fundamentals: identifying, assessing and mitigating security risks.
- Studied endpoint security and security monitoring concepts, including Trellix ePO.
- Learned secure coding practices and enterprise cybersecurity processes.

Cybersecurity Virtual Intern | Supraja Technologies **Sep 2022 - Nov 2022**

- Analyzed network traffic with Wireshark and performed security testing exercises on Kali Linux.
- Checked files, URLs and hashes for malicious indicators with VirusTotal and applied the MITRE ATT&CK framework to map attacker tactics and techniques.

PROJECTS

Firewall Policy, NAT & Log Analysis Lab | OPNsense, VMware, Kali Linux **GitHub**

- Built a two-zone (trust/untrust) lab with a Kali client routed only through an OPNsense firewall; ran four drills covering default deny, DNS/HTTPS-only rules, rule ordering and source NAT.
- Diagnosed failures from live firewall logs: a shadowed block rule that overrode allow rules, and stale session states that kept traffic flowing after rule changes until cleared.
- Documented each drill with log evidence, root cause and fix in a public GitHub write-up.

AWS Cloud Security Monitoring Dashboard | CloudTrail, CloudWatch, Lambda, SNS, Python **GitHub**

- Built custom CloudWatch metric filters on CloudTrail logs to detect root account usage, failed authentications, unauthorized API calls and IAM policy changes.
- Created a real-time dashboard across six security metrics with automated Python Lambda remediation and SNS alerting.
- Configured versioned, encrypted S3 log storage with log file integrity validation.

Vaultline: Secure File-Sharing Platform (in progress) | Java 17, Spring Boot 3, MySQL, JWT, Docker

- Building a secure file-sharing backend with JWT authentication, AES-GCM file encryption and expiring or one-time share links.
- Adding an access log to audit who opened each file, and packaging the service with Docker.

SKILLS SUMMARY

- **Security Monitoring & Analysis:** SIEM (Splunk), Log Analysis, Incident Investigation, Root Cause Analysis, Wireshark, VirusTotal, MITRE ATT&CK, Kali Linux, Vulnerability Management fundamentals
- **Cloud Security (AWS):** CloudTrail, CloudWatch, IAM, Lambda, S3, EventBridge, SNS
- **Programming & Data:** Java, Python, Spring Boot, SQL/MySQL
- **Tools & Platforms:** Linux, Git/GitHub, ServiceNow, PuTTY, Postman, Zena, OPNsense (lab), Agile/Scrum
- **Currently Learning:** Sysmon, Atomic Red Team, Splunk detection rules (SPL), Windows Event Log analysis, CompTIA Security+

CERTIFICATIONS

Certified in Cybersecurity (CC), ISC2 AWS Certified Cloud Practitioner AWS Certified AI Practitioner

EDUCATION

Vallurupalli Nageswara Rao Vignana Jyothi Institute of Engineering & Technology **Hyderabad, India**

Bachelor of Technology; CGPA: 9.10 / 10 **Dec 2020 - Apr 2024**
