PROFESSIONAL SUMMARY

Backend-focused professional with 1.5+ years of experience building and maintaining enterprise applications in production, including debugging, root cause analysis and SQL optimization. Experienced in working with Linux production environments, code reviews and Agile teams. Holds cloud and security certifications and has built an AWS monitoring project. Seeking an entry-level Java development role where strong fundamentals and a production support mindset can add value.

WORK EXPERIENCE

Packaged App Development Associate | Accenture **Jul 2024 - Dec 2025**

- Maintained and enhanced backend features for an enterprise Incentive Management Application using Java, Spring Boot and microservices.
- Wrote and optimized SQL queries for data retrieval and defect resolution; participated in Git-based code reviews.
- Debugged and resolved production issues through root cause analysis, tracking resolution in ServiceNow.
- Monitored Java batch jobs in Zena and accessed remote Linux production and QA servers via PuTTY to keep dealer-record processing timely and stable.

Cybersecurity Intern | Airbus **Apr 2024 - Jul 2024**

- Learned secure coding practices and enterprise cybersecurity processes.
- Learned vulnerability management fundamentals: identifying, assessing and mitigating security risks.

Cybersecurity Virtual Intern | Supraja Technologies **Sep 2022 - Nov 2022**

- Analyzed network traffic with Wireshark and performed security testing exercises on Kali Linux.

PROJECTS

Firewall Policy, NAT & Log Analysis Lab | OPNsense, VMware, Kali Linux **GitHub**

- Built a two-zone (trust/untrust) lab with a Kali client routed only through an OPNsense firewall; ran four drills covering default deny, DNS/HTTPS-only rules, rule ordering and source NAT.
- Diagnosed failures from live firewall logs: a shadowed block rule that overrode allow rules, and stale session states that kept traffic flowing after rule changes until cleared.
- Documented each drill with log evidence, root cause and fix in a public GitHub write-up.

AWS Cloud Security Monitoring Dashboard | CloudTrail, CloudWatch, Lambda, SNS, Python **GitHub**

- Built a serverless monitoring solution that detects suspicious activity in CloudTrail logs using CloudWatch metric filters.
- Created a real-time dashboard across six metrics with automated Python Lambda remediation and SNS alerting.
- Configured versioned, encrypted S3 log storage with log file integrity validation.

Vaultline Secure File-Sharing App (in progress) | Java 17, Spring Boot, Spring Security, MySQL, Docker

- Building a full-stack file-sharing application with encrypted file storage, expiring and one-time share links, and an access log.
- Applying password hashing, login lockout and role-based access, with unit tests for the share-link and encryption logic.

SKILLS SUMMARY

- **Java & Backend:** Java, Spring Boot, Microservices, REST APIs, SQL/MySQL, Python
- **Engineering Practices:** Debugging, Root Cause Analysis, Code Reviews, SQL Optimization, Production Support, Agile/Scrum
- **Cloud (AWS):** Lambda, S3, CloudWatch, CloudTrail, IAM, EventBridge, SNS
- **Tools & Platforms:** Git/GitHub, Postman, Linux, PuTTY, ServiceNow, Zena
- **Currently Learning:** JUnit, Mockito, Spring Data JPA/Hibernate, Spring Security, Docker, Maven

CERTIFICATIONS

Certified in Cybersecurity (CC), ISC2

AWS Certified Cloud Practitioner

AWS Certified AI Practitioner

EDUCATION

Vallurupalli Nageswara Rao Vignana Jyothi Institute of Engineering & Technology **Hyderabad, India**

Bachelor of Technology; CGPA: 9.10 / 10 **Dec 2020 - Apr 2024**
